

"We really are learning that through collective impact... we are working with a community, not doing something for a community. That we are coming in not just with our lens and our perspective on what the challenges and solution to those challenges are, but rather really growing in our understanding of all of the community partners that work in these different infrastructure components and developing a vision for our communities together."

Jennifer Grove, Community Development Manager,
Gulf Power Company; Achieve Escambia

Businesses around Florida are joining the Florida Chamber Foundation's [Prosperity Initiative](#) and taking a closer look at how businesses can pave the way toward economic opportunity.

How can we work together?

Join us on May 3 at the [2018 Florida Business Leaders' Summit on Prosperity & Economic Opportunity](#) where business, industry and community leaders will focus discussions on jobs, education, housing, health, food, safety, childcare, justice, transportation and community voice. Attendees will also be able to share and learn about best practices around the state and how they can be replicated.

You'll hear more about the progress Achieve Escambia has made, as well as discuss how to replicate these successes in other communities, from **Stan Connally, Chairman, President & CEO, Gulf Power; Vice Chair, Enterprise Florida; Vice Chair, Achieve Escambia.**

Who is missing?

Be sure to forward this email to others in your organization and in your community who you believe need to be part of the conversation.
