

Enhancing Life. Excelling in Cardiology

The word “Cardiology” suggests that it is the branch of science which deals with heart and its function related to health and abnormalities. It is very much connected with blood, arteries and veins, as blood is the main component of heart and for it we survive. The global cardiology market constitutes cardiac biomarkers, interventional cardiology and cardiovascular devices. The 2-day event is projected to implant firm strategies in the field of Cardiology, Cardiovascular Treatment and Cardiac Surgery. The conceptual and applicable knowledge shared will also nurture organizational collaborations to cherish scientific accelerations. Cardiology Meetings bring together world-eminent Speakers, Researches, latest treatment techniques and the advanced updates in Cardiology, Treatment and Management to highlight the major features of this conference.

The *CME accredited* 22nd International Conference on New Horizons in Cardiology & Cardiologists Education is going to be held at Berlin, Germany during March 07-08, 2019, revolving around the theme: “Experts Insights into Discovery of Millennium Routes of Cardiology”. As we all know, Berlin is a historic place with monuments and sculptures; therefore this meeting will also provide a break to the attendees for exploring the city with exciting tourist attractions. This meeting will be fulfilled by the participation of eminent cardiologists, cardiac surgeons, cardio-thoracic surgeons, cardiac nurses, scientists, professors, medical students and business professionals from pharmaceutical companies from every part of the world so that they can put forth their ideas and deliver their respective research works amongst others.

Cardiology Insights 2019 will provide experience for the on-going researches in Cardiology and related science fields. It will also provide insight to the novel inventions and techniques. It is very beneficial for the medical students and fellowship owners with encouraging discussions providing networking opportunities, offering practical experience, explaining new or modified regulations and giving them the chance to introduce latest ideas and approaches. It also gives prospects to the companies to showcase their products and have face-to-face meetings with scientists which help them to increase their business opportunities. Cardiology Insights 2019 also contributes companies to know about their market competitors. Cardiovascular disorder is a major risk factor

for cardiovascular diseases, cerebrovascular events and ischemic heart diseases, therefore one of the most important preventable causes of premature morbidity and mortality in developed and developing countries. It is often symptomless, so screening is vital before damage is done. Many surveys continue to show that Cardiac Disorder remains underdiagnosed, undertreated and poorly controlled. Blood Pressure has a skewed normal distribution within the population and the currently accepted model assumes risk is continuously related to BP.

The few main topics of the event are- Clinical Cardiology, Heart Diseases, Hypertension, Electrocardiography, Pediatric & Geriatric Cardiology, Interventional Cardiology, Cardio-oncology, Diabetes & Heart, Cardiac Surgery, Cardiac Nursing and so on.
