Accelerated Communications & Construction Announces Acquisition of Full-Service Utility Company Quality Cable and Fiber Services

Pensacola, FL – (October 12, 2018) Gulf Breeze- and New Orleans-based telecommunications company Accelerated Communications & Construction has announced the recent acquisition of Quality Cable and Fiber Services (QCFS), a full-service CATV, telephone, fiber network, electrical and utility construction company with locations in Pensacola and Gainesville. The combined company will serve customers in markets throughout the Florida Gulf Coast, Central Florida and New Orleans.

ACC, a leader in telecommunication and utility infrastructure, was founded in Gulf Breeze in 2008 by partners Jason Evert and Justin Sonntag and specializes in cable installation, commercial low-voltage projects, structured wiring and underground utility construction for commercial and residential projects. The company recently completed work on the newly-opened 258-unit **Southtowne Apartments** in downtown Pensacola.

“With experience and service at the core of both companies, the combined company will be able to offer more complete solutions, better economies of scale and an accelerated level of innovation,” said ACC president Justin Sonntag of the acquisition.

The ACC founders believe that combining the strength and capabilities of both companies benefits not only customers but also employees. “United in a common strategy, the complementary nature of our companies gives us the opportunity to further enhance the strong partnerships we have with our clients as well as to provide new opportunities for our team,” said Evert.
