## **SUNFARM ENERGY AWARDED OKALOOSA-WALTON SOLAR CONTRACT**

*Northwest Florida's premier local solar installer, **SunFarm Energy**, wins bid for Solar United Neighbors Okaloosa Walton Co-op; set to install solar on dozens of homes.*

**PENSACOLA, FL, Feb 4, 2019** Douglas Herrick, SunFarm Energy Partner and CEO, announced today that SunFarm Energy has been selected as Solar United Neighbors' solar partner for the Okaloosa Walton Solar Co-op. The Solar Co-op is comprised of homeowners who, with the guidance and assistance of Solar United Neighbors, come together to make the switch to clean solar energy.

Julia Herbst, Co-op Coordinator with Solar United Neighbors of Florida said, "It's exciting to facilitate a true community process like installer selection for a Solar United Neighbors Solar Co-op. The Okaloosa Walton group reviewed diligently for hours... We are thrilled to work with SunFarm Energy to bring more solar savings to the Panhandle."

Herrick shared his enthusiasm at being chosen: "We are honored to have been selected in this process. We look forward to serving the Okaloosa-Walton Solar Co-op and our community in the effort to provide a more affordable, renewable and sustainable energy source in the Panhandle."

By coming together as a group and choosing a single installer, participants can save on the cost of going solar and have the support of fellow participants and solar experts. David and Glenda Sherman, homeowners on the selection committee added, "We are so excited to have an installer that is local to the community but also well versed in a variety of combinations, solar, battery, EV and generator. It will meet the needs of the community as well as the individual."

The co-op is free to join and open to all homeowners in Okaloosa and Walton Counties. The deadline to join is March 1, 2019. For more information: visit their web page at
