

Digital Boardwalk Ranked in Channel Futures 2025 MSP 501 List

Pensacola, FL – June 26, 2025 — [Digital Boardwalk](#) is proud to announce that we have been ranked #115 on the 2025 [Channel Futures MSP 501 list](#), the most prestigious global ranking of managed service providers (MSPs). This recognition places [Digital Boardwalk](#) among the **top 501 MSPs in the entire world**, highlighting our continued commitment to service excellence, innovation, and delivering measurable value to the businesses we serve.

Now in its 18th year, the MSP 501 is a highly respected industry benchmark compiled by [Channel Futures](#), recognizing the world's most forward-thinking and high-performing IT service providers. Rankings are based on a comprehensive analysis of financial performance, innovation, growth, and service strategies.

“This recognition is a powerful validation of the hard work, expertise, and passion our team brings to the table every single day,” said Tim Shoop, CEO of Digital Boardwalk. “We’ve always strived to build something different, a people-first company that provides enterprise-level IT solutions with a personal touch. Being ranked among the best in the world proves that our approach works.”

From our headquarters in Pensacola, FL, and locations across Florida and Texas, [Digital Boardwalk](#) supports a wide range of small to mid-sized businesses with tailored IT solutions, cybersecurity services, and strategic technology guidance. As the IT landscape evolves, our team continues to lead the way in delivering proactive, secure, and scalable technology support.

A Benchmark for Innovation and Leadership in IT

The companies that make it onto the MSP 501 list are more than just service providers, they are pioneers. These MSPs are the innovators leading the global managed IT services industry. They set the bar for excellence, push boundaries with cutting-edge technology, and serve as examples of what it means to lead with integrity, adaptability, and strategy. Being ranked means you're not just keeping up with the times, you're helping shape what comes next.

Why It Matters Who You Partner With

Choosing the right IT partner is more critical than ever in a digital-first world. Businesses need to be asking: *Is my MSP on the MSP 501 list?* If not, *why not?* This ranking isn't just a title, it's proof that an MSP is held to the highest standards of service, innovation, and results. The MSPs on this list don't rest on their laurels, they continually evolve and invest in their clients' success. If your provider isn't ranked, it may be time to ask if you're really getting the best.

Big Impact, Lean Team

What makes [Digital Boardwalk's](#) ranking even more impressive is that we've earned our place among giants. Many of the top 100 MSPs on this list operate with hundreds, even thousands, of employees across the globe. [Digital Boardwalk](#), with just over 30 team members, stands shoulder to shoulder with these massive enterprises because we've built our company to be lean, efficient, and relentlessly forward-thinking.

We don't believe in doing things "the way they've always been done." In the past year alone, we've expanded our cybersecurity stack with cutting-edge offerings like [EnsureControl+™](#), our Zero-Trust security platform, and [EnsureScout™](#), our fully managed SIEM solution. We've also invested in training our staff on emerging AI compliance platforms to help clients safely and strategically implement tools like Microsoft Copilot and ChatGPT with their operations. Innovation isn't a buzzword for us, it's the core of how we serve.

Why This Matters to Our Clients and Community

Being recognized on the MSP 501 list means more than just industry bragging rights, it's a reflection of our commitment to raising the bar for what IT support should look like. For our clients, it translates into:

- Consistently high-quality service
- Access to cutting-edge solutions and best practices
- A dedicated team that's invested in long-term success

We are grateful to our amazing team whose dedication and expertise made this achievement possible, and to our loyal clients for trusting us as their technology partner. This honor belongs to all of you.
